

The Galilean Telescope

International Observatory on The Rights of Persons and Families

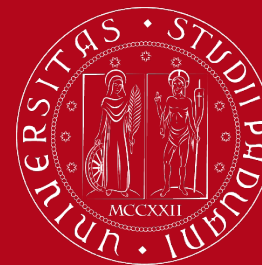

Il telescopio di Galileo

Osservatorio Internazionale sui
Diritti della Persona e delle Famiglie

The Galilean Telescope

International Observatory on The Rights of Persons and Families

Galileo did not invent the telescope, but he was the first to use it to study the heavens systematically.

The Galilean Telescope

International Observatory on The Rights of Persons and Families

The Galilean Telescope examines the role of law not just as it exists on statutes and cases, but as it is actually applied in the society (*law in action*).
